SUMMARY

Experienced Automation Tester with over 3.9 years of expertise in software quality assurance, specializing in Selenium (Java) and Playwright (JavaScript/TypeScript). Demonstrated success in designing robust test plans, developing end-to-end automation frameworks, and optimizing test coverage for diverse platforms. Proficient in integrating automation workflows into CI/CD environments such as Jenkins. Hands-on experience with API testing and cloud platforms (AWS, Azure). Adept at collaborating with cross-functional teams to deliver high-quality products within fast-paced environments. Well-versed in utilizing tools like GitHub Copilot to streamline coding tasks and enhance productivity, particularly for automation solution development. Seeking to contribute technical proficiency and a commitment to excellence to a dynamic organization.

EDUCATION

Gyan Ganga Institute of Tech. and Sciences   **07 2017 – 07 2021**
B. Tech Mech. Engineering - **CGPA - 8.6**   *Jabalpur, India*

SKILLS

- Github Copilot
- Selenium Grid
- Playwright
- JavaScript
- TypeScript
- PostMan
- Soap UI
- API Testing
- Jenkins
- DBMS
- AWS Core
- Selenium Webdriver

EXPERIENCE

Software Quality Analyst — Infosys | Playwright/TypeScript, Selenium/Java   **Oct 22 – Present**

- **Client – Telenet, Belgium**
- Automated SLA reporting and optimized Jira defect workflows by leveraging GitHub Copilot, significantly expediting development and implementation of quality solutions.
- Executed and scheduled daily sanity and regression tests in the Release Management Services (RMS) team using Gitlab, delivering a 40% reduction in manual testing efforts.
- Engineered and maintained comprehensive automated test suites using Playwright (Typescript) framework for UI and API validation across platforms such as Pega, Netcracker, NINAS, and iTDM, improving test coverage and reducing manual workload by 35%.
- Utilized Postman and SoapUI for robust API testing and OSS/BSS integration, while being recognized for proactive problem-solving and adaptability in a dynamic project environment.

Software Quality Engineer — Infosys | Linux, Git, ALM, ToaD, Selenium/Java   **Dec 21 – Oct 22**

- **Client – UBS, Switzerland**
- Worked in Service Validations Team for one of the World's Largest Investment Bank and performed Automation Testing for one of their web applications.
- Worked in a highly Agile team and utilized the knowledge in logging the bugs and testing the web application thoroughly.
- Identified functional defects and UI/UX bugs before the application hits production.
- Understood business requirements and Product Strategy.
- Handled the Database and checked the pre-post deployment changes.
